

**FOR IMMEDIATE RELEASE**

**SUNCOAST DIGITAL TECHNOLOGY, INC. EARNS  
ISO 9001:2008 AND AS9100:2009, REV. C CERTIFICATES  
OF REGISTRATION**

**Largo, Florida, November 14, 2011** - Suncoast Digital Technology, Inc. announced today that the Company has received the highly-regarded ISO 9001:2008 and AS9100:2009, Rev. C quality Certificates of Registration by NSF International Strategic Registrations.

The ISO 9000 Series Standard is an internationally-recognized quality management system developed by the International Organization for Standardization (ISO). The ISO 9001:2008 registration defines the quality system requirements for a company to achieve the expectations of its customers and to provide a culture focused on continued quality improvement. Developed in 1997 by the American Aerospace Quality Group to promote quality standards across all aspects of air transportation, the AS9100 standard is directly aligned with the ISO 9001 requirements. The AS9100:2009, Rev. C registration contains additional requirements, clarification and interpretation of a company's quality system.

Suncoast Digital Technology, Inc. initiated its quality certifications process at the end of 2010 and completed both ISO 9001:2008 and AS9100:2009, Rev. C Certifications simultaneously. In order to meet the needs of its customers and to enhance its overall quality system, Suncoast Digital Technology, Inc. pursued both certificates. After receiving notice of the designations, Company management commented that "the ISO 9001:2008 and AS9100:2009, Rev. C certifications highlight the company's long-term commitment to providing superior quality to our customers. The company's staff should be commended for achieving the registration requirements of the ISO9001 and AS9100 standards. This achievement allows us to objectively demonstrate our goal to exceed customer requirements and industry standards for quality product assembly."

In further support of the Company's commitment to the defense industry, Suncoast Digital Technology, Inc. is registered with the U.S. Department of State and complies with the variety of import/export regulations contained in the International Traffic in Arms Regulations – better known as ITAR.

Founded in 1991 and based in Largo, Florida, Suncoast Digital Technology, Inc. is a custom designer and manufacturer of Custom Control Panels, Keyboard Assemblies and Associated Electronic Display Assemblies, offering turnkey services for its customers in the aerospace, defense, medical and industrial industries.
